ATLANTA--(BUSINESS WIRE)--Oct. 26, 2017-- Carter's, Inc. (NYSE:CRI), the largest branded marketer in North America of apparel exclusively for babies and young children, today reported its third quarter fiscal 2017 results.

"We achieved our third quarter sales and earnings objectives, despite the significant impact of hurricanes in Texas, Florida, and Puerto Rico," said Michael D. Casey, Chairman and Chief Executive Officer. "Our growth was led by our U.S. retail and international businesses, including the contribution of our Skip Hop brand which we acquired earlier this year. We also announced today the acquisition of our licensee in Mexico, an investment which we believe will strengthen our leading market position in North America. Given the strength of our fall and holiday product offerings, together with the contribution of our new opportunities with Skip Hop, Amazon, China, and Mexico, we believe we are on track to achieve our growth objectives this year, our 29th consecutive year of sales growth."

EBITDA and Adjusted EBITDA are supplemental financial measures that are not defined or prepared in accordance with GAAP. We define EBITDA as net income before interest, income taxes, and depreciation and amortization. Adjusted EBITDA is EBITDA adjusted for the items listed in the table above

We present EBITDA and Adjusted EBITDA because we consider them important supplemental measures of our performance and believe they are frequently used by securities analysts, investors, and other interested parties in the evaluation of companies in our industry. These measures also afford investors a view of what management considers to be the Company's core performance.

The use of EBITDA and Adjusted EBITDA instead of net income or cash flows from operations has limitations as an analytical tool, and you should not consider them in isolation, or as a substitute for analysis of our results as reported under GAAP. EBITDA and Adjusted EBITDA do not represent net income or cash flow from operations as those terms are defined by GAAP and do not necessarily indicate whether cash flows will be sufficient to fund cash needs. While EBITDA, Adjusted EBITDA and similar measures are frequently used as measures of operations and the ability to meet debt service requirements, these terms are not necessarily comparable to other similarly titled captions of other companies due to the potential inconsistencies in the method of calculation. EBITDA and Adjusted EBITDA do not reflect the impact of earnings or charges resulting from matters that we consider not to be indicative of our ongoing operations. Because of these limitations, EBITDA and Adjusted EBITDA should not be considered as discretionary cash available to us for working capital, debt service and other purposes.

The Company evaluates its net sales on both an "as reported" and a "constant currency" basis. The constant currency presentation, which is a non-GAAP measure, excludes the impact of fluctuations in foreign currency exchange rates that occurred between the comparative periods. Constant currency net sales results are calculated by translating current period net sales in local currency to the U.S. dollar amount by using the currency conversion rate for the prior comparative period. The Company consistently applies this approach to net sales for all countries where the functional currency is not the U.S. dollar. The Company believes that the presentation of net sales on a constant currency basis provides useful supplemental information regarding changes in our net sales that were not due to fluctuations in currency exchange rates and such information is consistent with how the Company assesses changes in its net sales between comparative periods.
